Application Dated – September 20, 2011

Dear Ms. Miller:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated September 20, 2011 for the listed product.

The Registration Division (RD) has conducted a review of this request for its applicability under PRN 2007-4 and finds that the action(s) requested does not clearly fall within the scope of PRN 2007-4 and will require additional administrative review of the related files. The language needs to comply with 'PR-Notice 2007-4'; therefore, changes need to be made to the following:

1. **The following sentence was omitted from the residue removal instructions and must be included:**

**"Turn the container over onto its other end and tip it back and forth several times."**

2. **The wording of the bulk container disposal instructions is inconsistent with that stated in PRN 2007-4.**

Please be advised that PRNs are provided as guidance; they are not considered regulation by the Agency. Therefore, the RD reserves the right to make the above determination and concludes that this action must be submitted by you as an amendment. No further processing of this action will occur until a resubmission is made. The RD has determined that this action is denied and our records have been updated accordingly.
